About Precision Medicine

At Precision Medicine, we've built a modern pharmacy infrastructure designed to power the next generation of telehealth and longevity brands. Our model combines high-quality custom compounding, streamlined nationwide fulfillment, and seamless digital integrations that make scaling effortless for our partners. By focusing on precision, speed, and reliability, we enable clinics and digital health companies to deliver exceptional patient experiences while bringing innovative therapies to market with confidence.

With three strategically located facilities in New York, Florida, and California, we provide fast, reliable dispensing to 48 states as a fully licensed 503A compounding pharmacy. Our capabilities span both sterile and non-sterile medications, supported by a dedicated customer success team committed to anticipating and meeting your needs. We also offer full white-label fulfillment, ensuring your brand remains front and center while we operate as the silent engine supporting your operation.
